

# Assignment 8 – Salary Research

**STUDENT NAME:** Nicholas Garrett

## Instructions

For the three positions that you selected at the beginning of the semester, find the salary information for four different geographical locations. **Three geographical locations are provided. Please select the fourth location. An example is shown in the first row.**

If one of your positions was an internship, then find a full-time position to match the internship as closely as possible (it does not have to be an exact match). **Please consider entry level positions only** (these will usually have “Entry Level” or “Level I” as a designation).

Please do the following:

1. Use salary.com to find your initial information.
2. Find another source and see if the results match those you found on salary.com. **Do this for ONE LOCATION ONLY.** Include the link to your second source of salary information.

Position	Austin, Texas	Portland, Oregon	San Jose, California	Location 4: Las Vegas
Example: Technical Writer I	\$50,000	\$67,050	\$95,770	\$55,000
